Investment in Mutual Funds **IS NOT** a money deposit.

Disclaimer : The original language of this document is Thai. In case of any discrepancies, the Thai version shall prevail and supersede the English-translated version in all aspects.

What are you going to invest?

- The Fund invests in at least 2 foreign funds.
- The Foreign Funds include Country, Regional or Global Equity Funds.
- The Fund may invest in a particular Foreign Fund not more than average 79% of NAV in any accounting period.
- The Fund may use derivatives to hedge against exchange rate risk at Fund Manager's discretion.

Investment Strategy

Active management strategy

Who is the Fund suitable for?

- Investors who seek returns from investing in global equities.
- Investors who seek to invest in the Fund which pays dividend.
- Investors who are able to tolerate price volatility and understand that they may suffer losses because the value of securities may go down as well as up.
- Investors who are able to accept exchange rate risk and understand that movements in currency exchange rates can adversely affect the return of your investment.
- Recommended holding period : not less than 5 years.

The Fund is not suitable for?

Investors who seek to receive stable returns or principal preservation.

For further clarification on this investment policy and potential risks, what should you do?

- Read the full prospectus thoroughly, or **seek advice** from the management company or selling agents.
- **Do not invest without a thorough understanding of the feature and risks of the Fund.**

What are the key risks of the Fund?

Key Risks

- The Fund will use derivatives, at the Fund Manager's discretion, to hedge against exchange rate risk. As a result, investors may incur profit or loss from exchange rate movement.
- The Foreign Fund may use financial derivative instruments for Efficient Portfolio Management (EPM), which may expose the Fund to greater risk than the fund that invests directly in the underlying assets. The Fund therefore has greater profit/loss from such investment.
- The Fund invests in foreign funds. Therefore, they may encounter risk when foreign countries issuing measures during unusual crisis or there are economic, political, or social uncertainties and causing the Fund not to be able to bring the money back in the country. Accordingly, the investors may not receive redemption payment within time as specified in the prospectus.
- Since United Linked Plan returns are directly linked to the investment risk in investment portfolio, the investor should study details before deciding to invest in ULIPs.

Risk Spectrum

Risk Factors

Market risk

	Low				High
Standard Deviation (SD)	< 5%	5% - 10%	10% - 15%	15% - 25%	> 25%

High Issuer Concentration Risk

Total issuer concentration that the fund invests more than 10% of NAV.

	Low				High
Issuer concentration	$\leq 10\%$	10% - 20%	20% - 50%	50% - 80%	> 80%

High Sector Concentration Risk

Total sector concentration that the fund invests more than 20% of NAV.

	Low			High
Sector concentration	$\leq 20\%$	20% - 50%	50% - 80%	> 80%

High Country Concentration Risk

Total country concentration that the fund invests more than 20% of NAV.

	Low			High
Country concentration	$\leq 20\%$	20% - 50%	50% - 80%	> 80%

Remark: The Fund has high concentration in United states.

Exchange rate risk

	Low			High
FX hedging policy	Fully or Almost fully hedging	Partial hedging	Hedged at FM's discretion	Unhedged

Remark: The Fund will hedge against exchange rate risk approximately 0-50% of foreign exposure.

The Fund reserves the right not to offer any fund units

The Fund reserves the right not to offer any fund units to or for the benefit of the United States of America, US citizens, residents of the United States of America, or persons normally residing in the United States of America as well as the assets of such persons and companies or partnerships established and operating in the United States of America.

- Investment in the Fund is not a deposit and not under protection of Deposit Protection Agency. Therefore, investment in the Fund may contain risks where investors may suffer financial losses.
- The Fund is approved and regulated by the office of the Securities and Exchange Commission of Thailand.
- The draft prospectus does not represent that the office of the Securities and Exchange Commission of Thailand has certified the accuracy of the information contained in the prospectus or guaranteed the pricing or return on investment of such Fund. The Management Company has reviewed the information in this summary prospectus as of 30 November 2020, with care as the party responsible for the management of the Fund and certifies that the above information is correct, true and not misleading.

Definition of Risk Factors

- **Credit Risk** indicates the ability to repay debts and/or obligations of the issuer. For credit risk assessment, credit rating of bonds, which indicates debt servicing ability of the bond issuers based on their past performance and financial strength.

Credit ratings of long-term bonds can be briefly defined as follows.

Grade	TRIS	Fitch	Moody's	S & P	Description
Investment grade	AAA	AAA(thai)	Aaa	AAA	The highest possible rating assigned, which means <u>the lowest default risk</u> .
	AA	AA(thai)	Aa	AA	The second-highest rating, which means <u>very low default risk</u> .
	A	A(thai)	A	A	<u>Low default risk</u> .
	BBB	BBB(thai)	Baa	BBB	<u>Medium default risk</u> .
Below Investment grade	Below	Below	Below	Below	<u>High default risk</u> .
	BBB	BBB(thai)	Baa	BBB	

- Market Risk

(1) **Market Risk of Fixed Income Fund** involves in interest rates movement, which is subject to many external factors such as economic conditions, as well as domestic and international political factors. Normally, bond prices move in the opposite direction of interest rates. For instance, if interest rates in the global market rise, which causes interest rates of newly-issued bonds to increase in tandem, prices of existing bonds will fall. In general, the higher the portfolio duration, the more a bond's price will drop as interest rates rise.

(2) **Market Risk of Equity Fund** means change in value of assets, increase or decrease, in which the Fund invests as a result of external factors, e.g., economic/investment conditions, market sentiment and/or domestic or foreign political factors. If the standard deviation (SD) of the fund is high, this means that the fund has high historical volatility in asset prices.

- **Currency Risk** involves change in foreign exchange rates, which affects value of fund units. For instance, if the fund invests in assets quoted in US Dollar currency and Baht subsequently strengthens, the fund may get lower returns in Baht currency. On the contrary, the fund will gain higher returns in Baht currency under the opposite situation. Therefore, foreign exchange hedging strategy is the important tool for currency risk management. There are several hedging strategies i.e.,

- **Fully hedged or almost fully hedged:** Investors have no currency risk.
- **Partially hedged with specific ratio:** Investors may be exposed to currency risk.
- **Hedging at Fund Manager's discretion:** Investors may be exposed to currency risk.
- **Unhedged:** Investors are fully exposed to currency risk.

- **High Concentration Risk**

(1) **High Issuer Concentration Risk** caused by funds investing in any issuers of more than 10% of the NAV. If an event that affects operations, financial status or the stability of those issuers, the funds may have more volatile operating performance than funds that diversify their investments in many issuers.

(2) **Sector Concentration Risk** caused by investment in certain industries, more than 20% of the NAV, if the event that affects the industry, the funds may have more fluctuating financial performance than the fund that diversifies its investment in many industries.

(3) **Country Concentration Risk** caused by investing in one country more than 20% of the NAV. If the event affects such countries, such as politics, economy, society, etc., the fund may have more volatile operating performance than the diversified fund in many countries.

- **Portfolio Turnover Ratio (PTR) (%)** : Trading volume of fund assets by calculating from the lower value between the sum of the purchase value of the assets and the sum of the sold value of the assets invested in by the fund during the past 1 year divided by the average net asset value of the fund in the same period.

- **Tracking Errors** are fluctuations in the difference between the average return of the fund and the return of the benchmark which reflects the efficiency of mimic the index of the fund that has deviated from the benchmark, for example, if the fund has a low TE, it means that the fund's return has deviation from benchmark at a low rate, so this fund is effective in emulating the reference benchmark. While the funds with a high TE value show that the fund's return has deviated from the benchmark at a high rate, then the chances of return on investment will track the benchmark's return will be decreased etc.
