K Superstar Super Savings Fund Extra

K-SUPSTAR-SSFX

- Mixed Fund
- Super Savings Fund (SSF)
- Cross Investing Fund
- No Foreign Exposure

What are you going to invest?

Who is the Fund suitable for?

What are the key risks of the Fund?

Asset Allocation

Fees and Expenses

Fund Performance

Other Information

Investment in Mutual Funds **IS NOT** a money deposit.

Disclaimer : The original language of this document is Thai. In case of any discrepancies, the Thai version shall prevail and supersede the English-translated version in all aspects.

What are you going to invest?

The Fund has an investment policy to diversify into equity instruments, debt instruments, convertible bonds, deposits, units of property funds, units of infrastructure funds and/or units of private equity funds, as well as securities or other assets as specified by the SEC. However, the Fund will invest in securities listed on the Stock Exchange of Thailand (SET) and/or the Market for Alternative Investment (mai), on average not less than 65% of the Fund's NAV. The calculation of the proportion of investment in securities listed on SET and/or mai does not include investment in shares under IPO for listing in the said market.

In addition, the Fund may invest in investment units of mutual funds under the management of KAsset on average not more than 35% of the Fund's NAV or may invest in units of property funds or Real Estate Investment Trust (REITs) or units of infrastructure funds which is under the management of KAsset without any limitation.

The fund may invest in derivatives for Efficient Portfolio Management, structured notes, and non-Investment grade, unrated and/or unlisted securities.

Investment Strategy

Active management strategy

Who is the Fund suitable for?

- Investors who expect returns from investing in listed securities in SET and/or mai and seek to invest in the Fund which pays dividend.
- Investors who are able to tolerate price volatility and understand that they may suffer losses because the value of securities may go down as well as up.
- Investors who want to receive an additional tax privilege according to the Cabinet's approval on March 10, 2020, separated from the tax-deductible amount applied to normal Super Savings Fund.
- Investors who can accept conditions for investment period by holding units not less than 10 years from subscription date.

The Fund is not suitable for?

- Investors who seek to receive stable returns or principal preservation.

 For further clarification on this investment policy and potential risks, what should you do?

- Read the full prospectus thoroughly, or **seek advice** from the management company or selling agents.
- **Do not invest** without a thorough understanding of the feature and risks of the Fund.

What are the key risks of the Fund?

Key Risks

- Investor should study tax benefit as stated in the Investment Handbook of SSF.
- The unitholders of SSF not being complied with investment conditions shall not be entitled to receive tax benefits and shall return such benefits within specified period or will be subject to surcharge and penalties in accordance with Section 27 of the Revenue Code.
- SSF units are not permitted to be disposed of, distributed, transferred, pledged or used as collaterals.
- The Fund may invest in non-Investment grade and/or unrated securities. Therefore, investors may be exposed to greater risk.
- The Fund may use financial derivative instruments for Efficient Portfolio Management (EPM) and/or Structured Notes, which may expose the Fund to greater risk than the fund that invests directly in the underlying assets. The Fund therefore has greater profit/loss from such investment.
- The Fund may invest in units of mutual funds under the management of KAsset. This policy may incur conflict of interest from cross-fund investing.
- In the case that there is a tendency that there will be a redemption of more than 2/3 of the total investment units sold. The management company may use discretion in the dissolution of the mutual fund and may suspend the subscription or redemption order that has been received.
- The management company reserves the right to temporarily or permanently not receive subscription orders. In the event that the Cabinet or related parties cancel the tax privileges and/or the value of all sold investment units reduced to less than 300 million baht on any business day and/or all remaining unit holders have invested in terms and conditions as specified by law and/or other conditions as the management company deems appropriate. By notifying unitholders at least 3 business days in advance via the website and notify the SEC within 15 days from the date of said change.

Risk Spectrum

Risk Factors

Market risk

High Issuer Concentration Risk

Total issuer concentration that the fund invests more than 10% of NAV.

High Sector Concentration Risk

- Investment in the Fund is not a deposit and not under protection of Deposit Protection Agency. Therefore, investment in the Fund may contain risks where investors may suffer financial losses.
- The Fund is approved and regulated by the office of the Securities and Exchange Commission of Thailand.
- The draft prospectus does not represent that the office of the Securities and Exchange Commission of Thailand has certified the accuracy of the information contained in the prospectus or guaranteed the pricing or return on investment of such Fund. The Management Company has reviewed the information in this summary prospectus as of 30 September 2021, with care as the party responsible for the management of the Fund and certifies that the above information is correct, true and not misleading.

Definition of Risk Factors

- **Credit Risk** indicates the ability to repay debts and/or obligations of the issuer. For credit risk assessment, credit rating of bonds, which indicates debt servicing ability of the bond issuers based on their past performance and financial strength.

Credit ratings of long-term bonds can be briefly defined as follows.

Grade	TRIS	Fitch	Moody's	S & P	Description
Investment grade	AAA	AAA(thai)	Aaa	AAA	The highest possible rating assigned, which means <u>the lowest default risk</u> .
	AA	AA(thai)	Aa	AA	The second-highest rating, which means <u>very low default risk</u> .
	A	A(thai)	A	A	<u>Low default risk</u> .
	BBB	BBB(thai)	Baa	BBB	<u>Medium default risk</u> .
Below Investment grade	Below BBB	Below BBB(thai)	Below Baa	Below BBB	<u>High default risk</u> .

- Market Risk

(1) **Market Risk of Fixed Income Fund** involves in interest rates movement, which is subject to many external factors such as economic conditions, as well as domestic and international political factors. Normally, bond prices move in the opposite direction of interest rates. For instance, if interest rates in the global market rise, which causes interest rates of newly-issued bonds to increase in tandem, prices of existing bonds will fall. In general, the higher the portfolio duration, the more a bond's price will drop as interest rates rise.

(2) **Market Risk of Equity Fund** means change in value of assets, increase or decrease, in which the Fund invests as a result of external factors, e.g., economic/investment conditions, market sentiment and/or domestic or foreign political factors. If the standard deviation (SD) of the fund is high, this means that the fund has high historical volatility in asset prices.

- **Currency Risk** involves change in foreign exchange rates, which affects value of fund units. For instance, if the fund invests in assets quoted in US Dollar currency and Baht subsequently strengthens, the fund may get lower returns in Baht currency. On the contrary, the fund will gain higher returns in Baht currency under the opposite situation. Therefore, foreign exchange hedging strategy is the important tool for currency risk management. There are several hedging strategies i.e.,

- **Fully hedged or almost fully hedged:** Investors have no currency risk.
- **Partially hedged with specific ratio:** Investors may be exposed to currency risk.
- **Hedging at Fund Manager's discretion:** Investors may be exposed to currency risk.
- **Unhedged:** Investors are fully exposed to currency risk.

- **High Concentration Risk**

(1) **High Issuer Concentration Risk** caused by funds investing in any issuers of more than 10% of the NAV. If an event that affects operations, financial status or the stability of those issuers, the funds may have more volatile operating performance than funds that diversify their investments in many issuers.

(2) **Sector Concentration Risk** caused by investment in certain industries, more than 20% of the NAV, if the event that affects the industry, the funds may have more fluctuating financial performance than the fund that diversifies its investment in many industries.

(3) **Country Concentration Risk** caused by investing in one country more than 20% of the NAV. If the event affects such countries, such as politics, economy, society, etc., the fund may have more volatile operating performance than the diversified fund in many countries.

- **Portfolio Turnover Ratio (PTR) (%)** : Trading volume of fund assets by calculating from the lower value between the sum of the purchase value of the assets and the sum of the sold value of the assets invested in by the fund during the past 1 year divided by the average net asset value of the fund in the same period.

- **Tracking Errors** are fluctuations in the difference between the average return of the fund and the return of the benchmark which reflects the efficiency of mimic the index of the fund that has deviated from the benchmark, for example, if the fund has a low TE, it means that the fund's return has deviation from benchmark at a low rate, so this fund is effective in emulating the reference benchmark. While the funds with a high TE value show that the fund's return has deviated from the benchmark at a high rate, then the chances of return on investment will track the benchmark's return will be decreased etc.
