Other Information

**Investment in mutual fund is not bank deposit.**

## What are you going to invest in?

### ■ Investment Policy

The Fund will invest only once in foreign fixed income securities and/or foreign deposit and hold them to maturity. In addition, the Fund fully hedges foreign exchange rate risk.

### ■ Fund Management Strategy

Buy-and-hold strategy

## Who is this fund suitable for?

- An investor who expects return higher than bank deposit and can accept return lower than investing in equity securities.

## Who is this fund **not suitable** for?

- An investor who aims to receive certain amount of return or protect full amount of principal.
- An investor who wants to redeem unit trusts before 6-month period.

## What to do if you do not yet understand investment policy and risks of this fund?

- **Read** fund prospectus or **Inquire** information from selling agents and the Management Company.
- **Do not make an investment** if you do not understand feature and risks of this fund well enough.

## What do you have to specially beware of?

### Key Risks

- The Fund may not receive principal and return as expectation if the issuers of invested securities are unable to pay back principal and interest.
- The Fund's NAV may increase or decrease before maturity due to mark to market.
- The Fund cannot be redeemed before maturity. Thus, investors will not receive investment back before 6-month period.

### Estimated Return for automatic redemption

At maturity, the Management company will proceed on auto-redemption with expected return of approximately 1.35% per annum of initial investment which is calculated from approximately 6 months investment. Details of the fixed income securities that the fund will invest in are as follows:

Securities*	Issuer Credit Ratings **	Estimated Return of the Securities in Thai Baht (per annum)***	Investment Proportion*	Estimated Fund Return in Thai Baht (per annum)
Deposit at PT Bank Rakyat Indonesia, Indonesia	Baa2/Moody's	1.70%	19.00%	0.32%
Deposit at Al Khalij Commercial Bank, Qatar	A3/Moody's	1.72%	19.00%	0.33%
Deposit at China Construction Bank Corporation, Hong Kong SAR, China	A1/Moody's	1.46%	18.00%	0.26%
Deposit at Commercial Bank of Qatar, Qatar	A3/Moody's	1.46%	18.00%	0.26%
Deposit at Qatar National Bank, Qatar	Aa3/Moody's	1.46%	17.00%	0.25%
Deposit at Bank of China, People's Republic of China	A1/Moody's	1.30%	9.00%	0.12%
Total			100.00%	1.54%
Estimated Fund Expenses (if any)****				0.19%
Estimated Return to Investor (per annum)				1.35%

\* The Management Company may use discretion to change invested securities or investment proportion when it is under necessary and appropriate situation in order to protect investor's benefits. Such changes shall not significantly increase the risk level of invested securities. The Management Company may consider to invest in other securities instead and/or make additional investment from securities as indicated above which are under investment universe of the Management Company and estimated return may be subjected to change. In case of such changes, the investor might not receive expected return as indicated above.

\*\* Credit rating agency shown above is only one of credit rating agencies which the Management Company uses for investment consideration.

\*\*\* Data of expected return from Issuers as of January 23, 2020.

\*\*\*\* Estimated Fund expenses (including management fee) may be subjected to change. In case, the Fund receives returns higher than disclosed rate during IPO, the management company may charge additional management fee but will not exceed the management fee rate stated in the prospectus.

- Investment in unit trusts is neither bank deposit nor under the protection of Deposit Protection Agency. Investors may have risk of not receiving return of investment funds in full.
- Approved and regulated by the office of the Securities and Exchange Commission.
- The consideration of draft prospectus of this Fund does not mean that the SEC has certified the correctness of the information in the prospectus or guaranteed the price or return of the unit trusts. As the person responsible for managing the Mutual Fund, The Management Company carefully reviewed the information in the Fund Fact Sheet as of January 27, 2020 and hereby certifies that the information is correct, not fault and does not mislead.

## Definition of Risk Factors

- **Credit Risk** indicates the ability to repay debts and/or obligations of the issuer. For credit risk assessment, credit rating of bonds, which indicates debt servicing ability of the bond issuers based on their past performance and financial strength. Credit ratings of long-term bonds can be briefly defined as follows.

Rate	TRIS	Fitch	Moody's	S&P	Description
Investment grade	AAA	AAA(thai)	Aaa	AAA	The highest possible rating assigned, which means the lowest risk of payment default.
	AA	AA(thai)	Aa	AA	The second-highest rating, which means very low risk of payment default.
	A	A(thai)	A	A	Low risk of payment default.
	BBB	BBB(thai)	Baa	BBB	Medium risk of payment default.
Below Investment grade	Below BBB	Below BBB(thai)	Below Baa	Below BBB	High risk of payment default.

- **Market Risk** of Fixed Income Fund involves in interest rates movement, which is subject to many external factors such as economic conditions, as well as domestic and international political factors. Normally, bond prices move in the opposite direction of interest rates. For instance, if interest rates in the global market are rising, which causes interest rates of newly-issued bonds to increase in tandem, prices of existing bonds are falling. Mutual funds with greater portfolio duration are likely to witness more price fluctuation than those with smaller portfolio duration.
- **High Concentration Risk**
  - High Issuer Concentration Risk occurs when the fund invests in any issuer more than 10% of NAV. If there are any events affect the operation, financial status or stability of such issuer, the fund may have more performance volatility than the fund that diversifies its investment in various issuers.
  - High Sector Concentration Risk occurs when the fund invests in any issuer more than 10% of NAV. If there are any events affect such sector, the fund may have more performance volatility than the fund that diversifies its investment in many sectors.
  - High Country Concentration Risk occurs when the fund invests in any country more than 20% of NAV. If there are any events affect such country such as political, economic and social issues. The fund may have more performance volatility than the fund that diversifies its investment in many countries.

- **Exchange Rate Risk** involves change in foreign exchange rates, which affects value of fund units. For instance, if a fund invests in assets quoted in US Dollar currency during time of Baht depreciation but takes profit when the Baht strengthens, the fund will get lower returns in local currency. In contrast, if the fund invests in those assets when Baht is stronger and takes profit during times of a weakening Baht, it will gain higher returns in local currency. Therefore, foreign exchange hedging strategy is a major tool for currency risk prevention or reduction. There are many ways to limit currency risks, i.e.,
  - Fully hedged or almost fully hedged: Investors have no currency risk.
  - Partially hedged with specific ratio: Investors may be exposed to currency risk.
  - Hedging at Fund Manager's discretion: Investors may be exposed to currency risk.
  - Unhedged: Investors are fully exposed to currency risk.
